Peer Paper Review Guidelines

Please consider reading the article, "Reviewing and Revising" provided to you via email. This may help you in your peer review. Please respond and comment to the questions below. Please remember that you will share this feedback with the author. Comment appropriately. Please feel free to comment directly on the paper in addition to answering the questions below. Please write clearly. Feel free to use the reverse side of this form if you need additional space. Please return your copy of the paper and this form to me by Friday, August 3, 2007 at 1:00 PM.

Name of author of reviewed work: _____

Name of reviewer: _____

Title of paper: _____

Date: _____

1) In your own words, please describe the research of the paper you are reviewing in 2-3 sentences.

2) Please provide comments on what you think were GOOD in the paper.

3) Discuss the overall clarity of the paper. Is there anything specific you would like to address in any specific area? (Introduction, methodology, analysis of data, results, conclusion, discussion, etc.)

4) Read the abstract before and after reading the paper. Does the abstract adequately summarize the author's work?

5) Does the paper address the necessary categories required by the paper rubric? If no, please indicate the missing areas. Also comment on style, figures, grammar, references, etc. It may be easier to comment on this question on the copy of the paper itself.

5) Please provide recommendations for the author to improve her or his paper.
